VINCENT LIGHTING SYSTEMS JOINS THE WORLD OF RIGGING

RELIABLE

Vincent Lighting Systems provides reliable entertainment and architectural lighting and rigging products that are inspected, maintained and tested for compliance with industry standards prior to delivery. Our reputation for reliability is backed with a commitment to providing on-time delivery, a personal equipment operation guarantee and after-hours project, rental and production support.

PROFESSIONAL

Every customer of Vincent Lighting Systems can count on a dedicated team of certified and degreed lighting professionals with an accumulated 500+ years of industry expertise, all fully focused on delivering the utmost professional experience.

CREDIBLE

Since 1978, the award-winning professionals at Vincent Lighting Systems have met the needs of entertainment and architectural lighting customers with the broadest range of equipment and products from more than 100 industry manufacturers. We have managed more than 10,000 projects and productions, including specialty architecture, bridges, theatres, schools, houses of worship, weddings and corporate events.

SYSTEMS INTEGRATION

IS YOUR STAGE ANSI COMPLIANT?

The ANSI E1.4 Standard requires that your theatrical stage equipment be inspected annually.

Now the company you have trusted for your stage lighting needs can inspect your stage rigging for safety as well.

VLS will inspect your stage rigging system, using qualified personnel. Our inspection includes a detailed report, written by an ETCP-certified rigger. This report will provide specifics for immediate needs, as well as potential concerns to monitor. Our rigging management team brings over 20 years of experience to focus on your stage.

IDEASTREAM - WESTFIELD INSURANCE THEATRE
Cleveland, OH
